

# **Data Visualization and Interpretation Lab**

## **Autumn 2025**

### **Lab Assignment**

Name: Sanya Agarwal

Roll no.:R2142230839

Sap\_ID:500120145

Program: B.Tech CSE

Semester: 05

Batch: 01 (Data Science)

Date of assignment: 08-10-25

---

School of Computer Science,  
University of Petroleum and Energy Studies,  
Dehradun

Task:

Create a financial dashboard on “financial sample.xlsx” dataset. The dashboard should have the following:

1. A dashboard heading including title and author name

## FINANCIAL DASHBOARD by Sanya Agarwal

2. Total sales

Total  
Sales

118,726,350

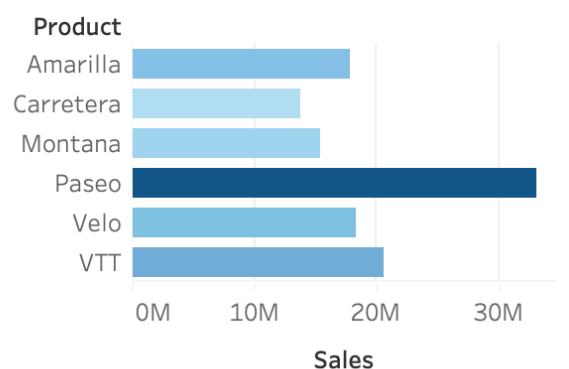

3. Units sold

Units  
Sold

1,125,806

4. A table to show category wise total sales of products

### Category-wise Sales

5. A plot to show Sales by year/month

Sales Trend by Month and Year

6. A plot to show sales by segments

Sales by Segment

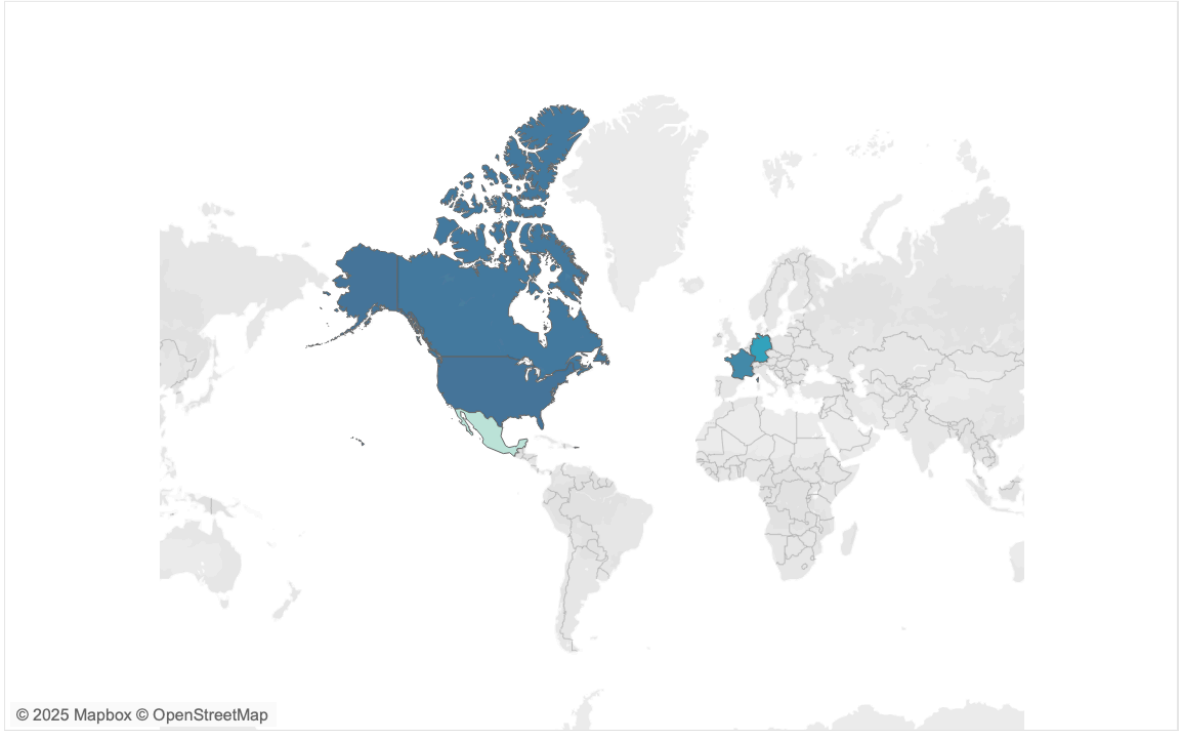

Segment

7. A plot to show sales by country

# Sales by Country

8. A plot to show profit by segments

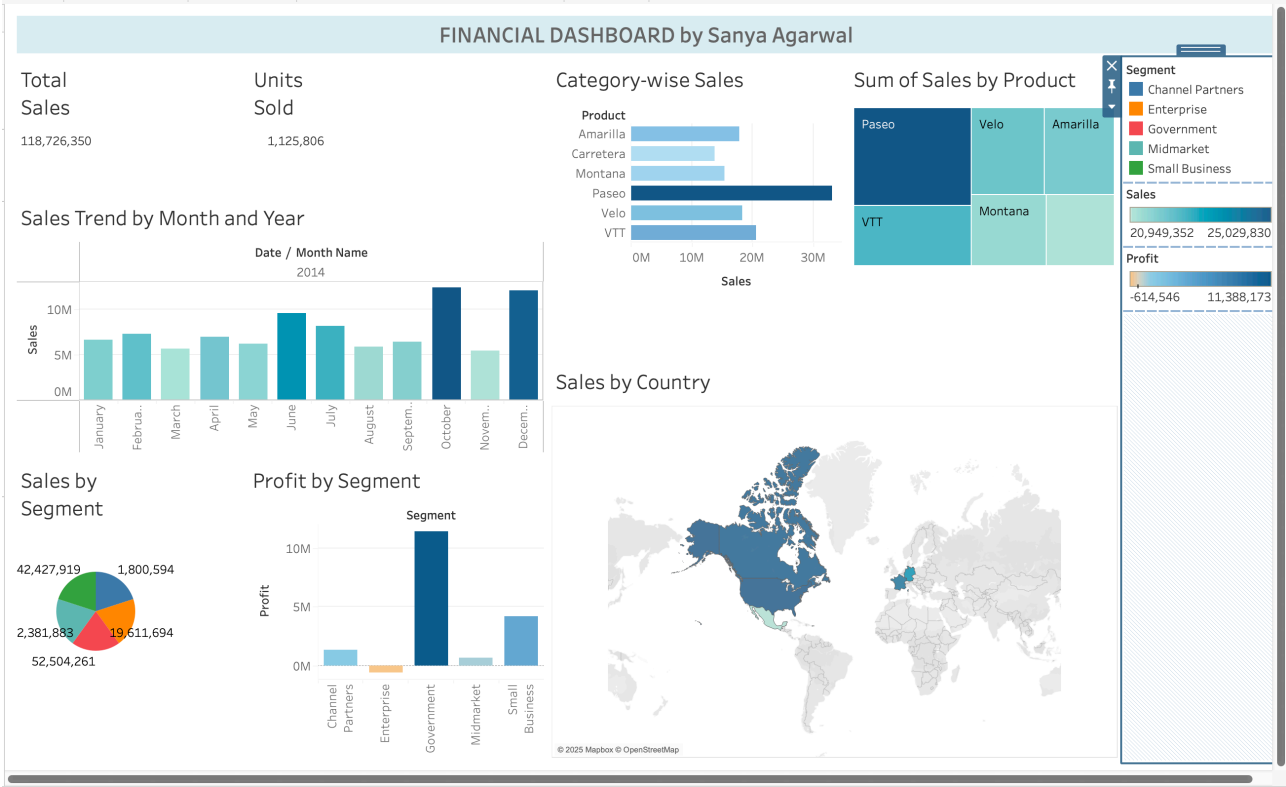

9. A plot to show sales by product

Sum of Sales by Product

Note: Use appropriate plot and do proper formatting.

Write insights/observations after analyzing each tile in your dashboard.

#### 1. Total sales and Units sold

Interpretation : The financial performance represents total sales (118,726,350) and units sold(1,125,806) for given period. It indicates the total revenue and volume of reported period.

#### 2. Category-wise sales

Interpretation : The horizontal bar shows total sales by product category. Paseo leads with over 30 million in sales. It shows that Paseo is dominant contributor among other categories.

#### 3. Sales trend by month/year

Interpretation : The bar chart displays the monthly sales over 2014. Sales are stable from January to August then we can see a significant rise in September and peak in October and December. This pattern indicates seasonal trend, the rise in demand.

#### 4. Sales by Segment

Interpretation : The pie chart divides total sales by market segments. This highlights from where most revenue is generated.

#### 5. Sales by country

Interpretation : The map uses shading (blue , teal) to show geographic distribution of sales. The lighter color indicates the minimal contribution in sales

#### 6. Profit by segment

Interpretation : The segmented bar chart represents profit distribution across different segments. Government yields the highest profit by wide margin.

## 7. Sum of Sales by Product

Interpretation : The treemap visualizes each product's contribution to overall sales. Paseo occupies the largest area in treemap.

## Conclusion - Financial Dashboard

It provides a comprehensive overview for business and demonstrating clear product and segment performance. Paseo dominates product sales.
